CLOUD COST MANAGEMENT TIPS

Optimize Cloud Costs through Governance and Collaboration

Find out how to collaborate to reduce cloud costs.

DOWNLOAD THE WHITE PAPER

ANALYSIS AND REPORTING

Account for all your costs

Data from all your clouds
See usage and cost data from public and private clouds in a single unified dashboard.

Slice and dice
Slice your costs by cloud account, team, or app to understand usage trends.

REQUEST A DEMO

Chargeback and showback
Leverage tags to allocate costs to departments or business units.

COLLABORATIVE OPTIMIZATION

Work together to save

Uncover savings
Get automated recommendations that reduce costs.

Involve resource owners
Deliver savings suggestions to the right cloud users.

Track progress

Access scoreboards that roll up progress on cost savings.

AUTOMATED ACTION

# Take action on insights

REQUEST A DEMO

Reduce noise
Provide feedback to improve future recommendations.
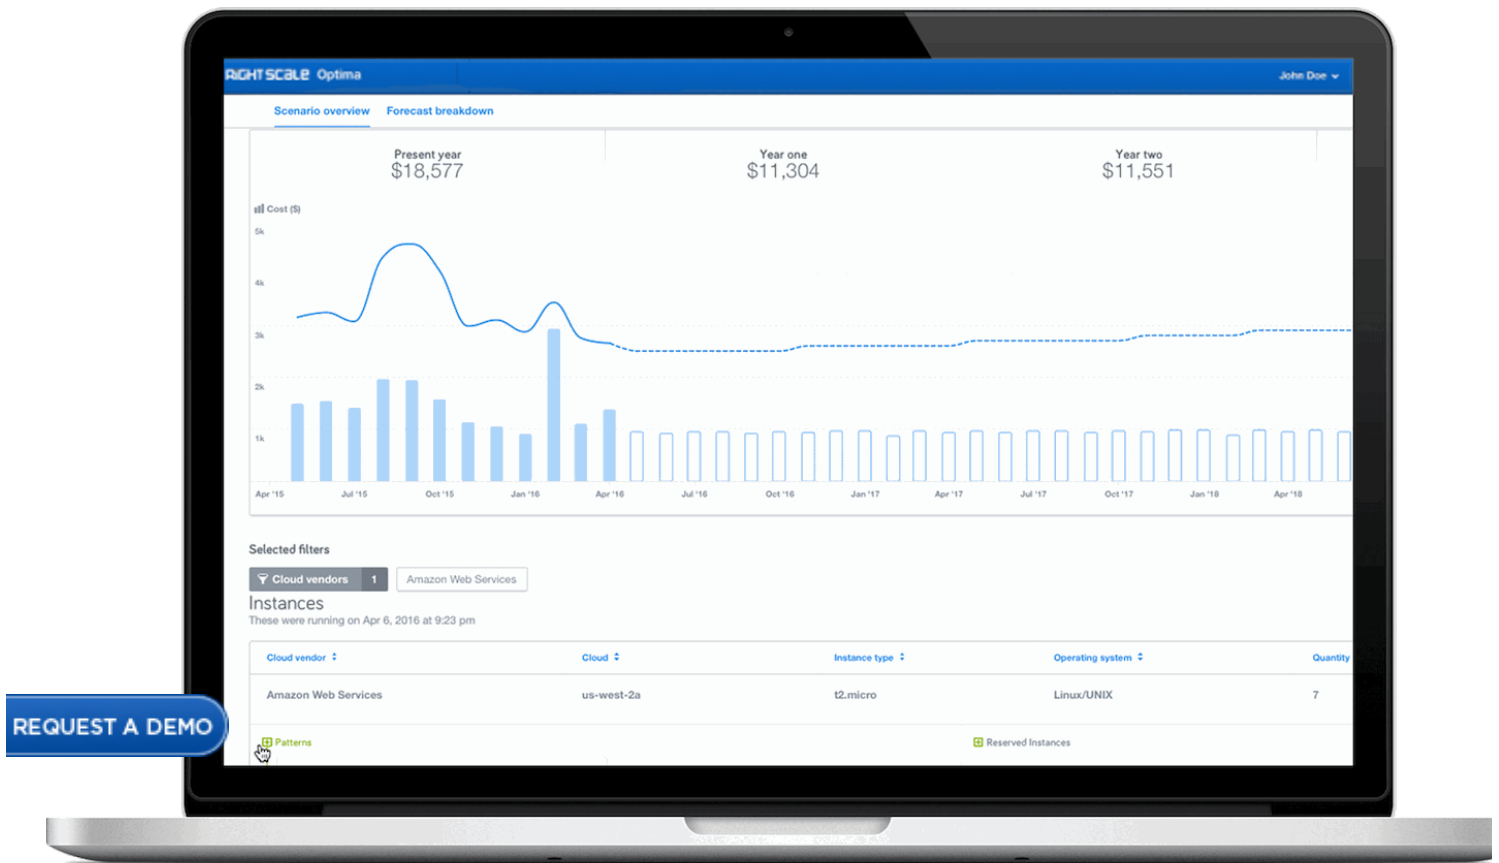

Target inefficient spend
Use one-click options to terminate or delete unused or idle resources.

Leverage cloud provider discounts
Optimize use of AWS Reserved Instances and Google Committed Use
Discounts.

BUDGET AND FORECAST

Plan for the future

Predict application costs
Forecast future costs for prospective or existing cloud applications.

Track budgets
Develop budgets and alert users or managers of overruns.

Compare options
Evaluate different clouds, instance types, and purchase options.

RightScale Cited As a Leader in
Cloud Cost Monitoring and Optimization

"Optima's governance features are built around a strong policy engine that will automate a wide range of infrastructure asset scheduling and life-cycle management activities. In addition, Optima supports robust cost scenario analysis and forecasting capabilities."

The RightScale Optima Difference

RightScale Optima solves the most challenging problem of cloud cost optimization: collaborating between cloud governance teams and resource owners to take action on recommendations and reduce costs.

RightScale Optima Benefits	What You Get
Quick ROI	Get recommendations that identify instant savings opportunities across the enterprise.
Collaboration	Automatically assign optimization recommendations to resource owners and deliver tailored alerts.

Noise Reduction	Enable resource owners to provide feedback and tag recommendations to prevent future alerts.
Automated Action	Provide push-button execution of recommendations by resource owners and ongoing policy-based automation.
Enterprise-wide Coordination	Track progress on optimization recommendations with scoreboards.
